

BES BLACK HACK: HACKATHON

Current state of the government and social environment has brought an even greater attention to the need for more diversity and inclusion, kindness, empathy, etc. Create a solution that will help promote social good.

Can you develop a solution to address these concerns? Some example categories are volunteerism, societal norms, social mobility, and diversity and inclusion just to name a few!

Keep in mind that time is limited!

We ask that you document each phase as your team progresses including brainstorming, task delegation, challenges, successes, and anything else you may find useful for the judges to know! Please compile this information into a presentation that you will show at the end of the day!

GOOD LUCK!

Criteria

You will be judged on:

- Innovation
- Impact
- UI/UX
- Technical Demo

Demos

— — —

Submit your presentation demo by **5:30pm** to
bes.techchair@gmail.com

- **4 min per presentation**
- **2 min Q/A per team**
